

D-Lib Magazine: Its First 13 years

by Taemin Park

My paper entitled, "*D-Lib Magazine: Its First 13 years*," has been published in the January/February 2010 issue of *D-Lib Magazine*. *D-Lib Magazine* is one of the first generation of the "born digital" scholarly journals. Authorship characteristics of the magazine were studied, including author productivity, author's gender, type of affiliated institutions, authors' geographic distribution, multiple authorship and the average number of references per article. The impact of *D-Lib Magazine* was examined by utilizing Web of Sciences databases. The most cited *D-Lib Magazine* authors, articles, and the lists of authors, journals, and academic fields that often cited the magazine are presented.

This research was partially supported by an InULA Research Grant for data collection.
