XSEDE Vision/Mission/Goals

- **Tag line:**
 - *XSEDE – accelerating scientific discovery*
- **Vision:**
 - XSEDE aspires to be ***the*** place to go to access digital research services.
- **Mission:**
 - Accelerate scientific discovery by enhancing the productivity of researchers, engineers, and scholars by deepening and extending the use of XSEDE's ecosystem of advanced digital, services and by advancing and sustaining the XSEDE advanced digital infrastructure.
- **Goals:**
 - *Deepen and extend* the use of the XSEDE ecosystem.
 - *Advance* the XSEDE infrastructure.
 - *Sustain* the XSEDE infrastructure.

XSEDE

Science requires diverse digital capabilities

- XSEDE is a comprehensive, expertly managed and evolving set of advanced heterogeneous high-end digital services, integrated into a general-purpose infrastructure.
- XSEDE is about increased user productivity
 - increased productivity leads to more science
 - increased productivity is sometimes the difference between a feasible project and an impractical one

XSEDE

XSEDE supports a breadth of research

From direct contact with user community as part of requirements collections

- Earthquake Science and Civil Engineering
- Molecular Dynamics
- Nanotechnology
- Plant Science
- Storm modeling
- Epidemiology
- Particle Physics
- Economic analysis of phone network patterns
- Brain science
- Analysis of large cosmological simulations
- DNA sequencing
- Computational Molecular Sciences
- Neutron Science
- International Collaboration in Cosmology and Plasma Physics
- Social Sciences
- Humanities

XSEDE supports thousands of such projects - there are sample domains.

XSEDE

XSEDE offers a variety of resources

- Leading-edge distributed memory systems
- Very large shared memory systems
- High throughput systems, e.g. OSG
- Visualization servers
- Accelerators and co-processors including NVIDIA GPUs and XEON Phi (MICs)

Many scientific problems have components that call for use of more than one architecture.

XSEDE

Current XSEDE Compute Resources

- Stampede @ TACC
 - 6 PFLOPS (PF) Dell Cluster w/ GPUs and Xeon PHIs
- Gordon @ SDSC
 - 341 TF Appro Distributed SMP cluster
- Lonestar (4) @ TACC
 - 302 TF Dell Cluster
- Trestles @ SDSC
 - 100TF Appro Cluster
- Blacklight @ PSC
 - 37 TF SGI UV (2 x 16TB shared memory SMP)
- Mason
 - 3.8 TF HP Cluster with large memory nodes (2TB/node)

<https://www.xsede.org/web/xup/resource-monitor>

XSEDE

Current XSEDE Visualization and Data Resources

- Visualization
 - Nautilus @ UTK
 - 8.2 TF SGI/NVIDIA SMP
 - 960 TB disk
 - Longhorn @ TACC
 - 20.7 TF Dell/NVIDIA cluster
 - 18.7 TB disk
- Storage
 - HPSS @ NICS
 - 6.2 PB tape
 - Data Supercell @ PSC
 - 4 PB tape
 - Ranch @ TACC
 - 40 PB tape
 - Data Oasis @ SDSC
 - 4 PB tape
 - XWFS – Distributed
 - 600TB disk

XSEDE

XSEDE User Services

XSEDE User Services are grouped into four main areas:

- Technical information
 - Always available via web site and XSEDE user portal
- Allocations
 - Request access to XSEDE' s systems
- Training
 - Sign up for classes to learn to use XSEDE resources
- User Engagement
 - Includes 'consulting support' to answer questions
 - Also includes user interviews, focus groups, and surveys

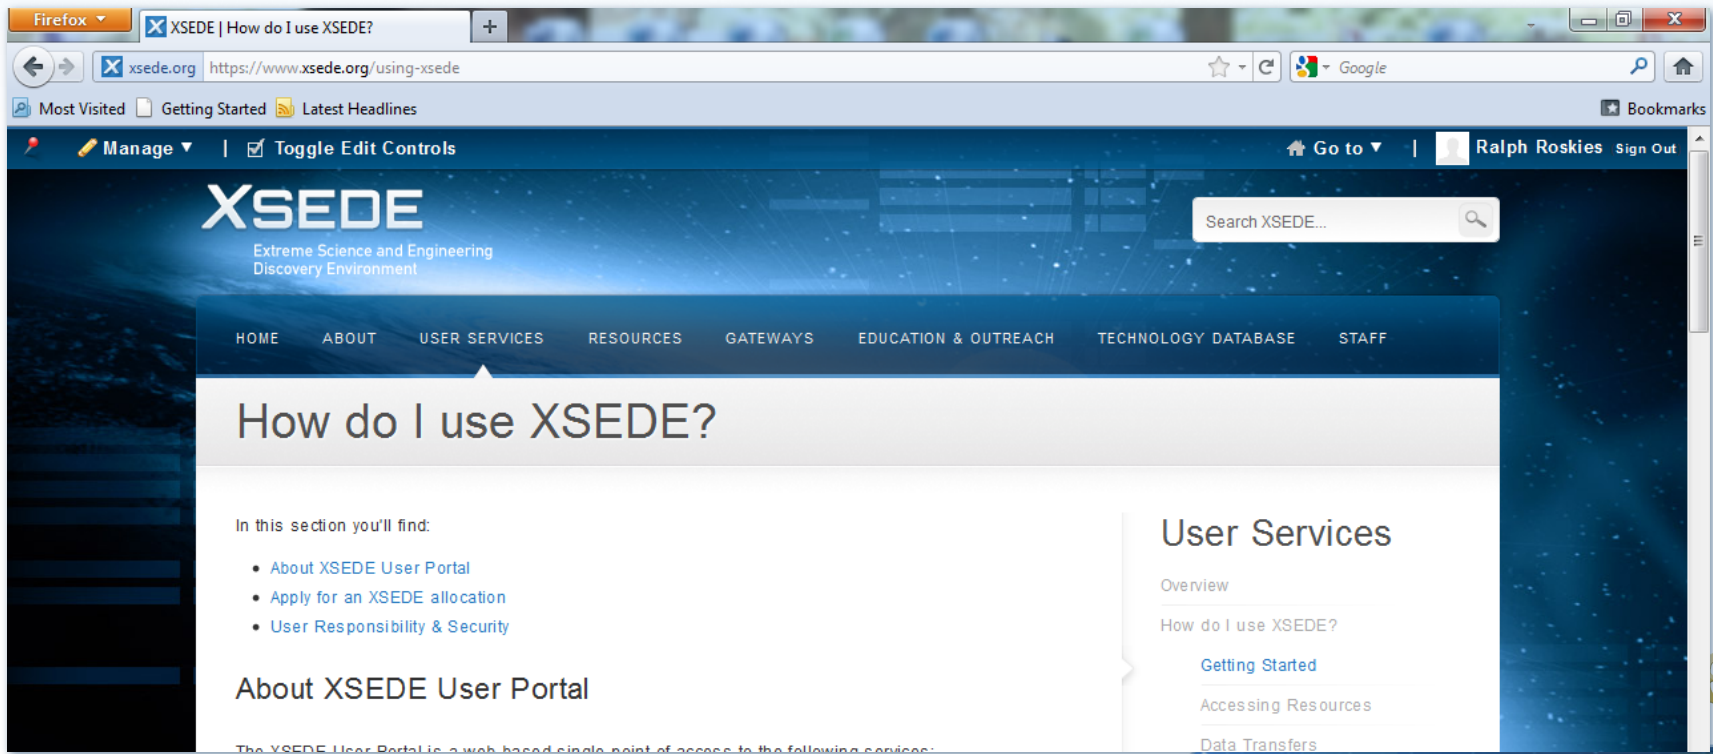

The XSEDE logo, which consists of the word 'XSEDE' in a large, white, sans-serif font. The background of the logo is a dark blue grid with a glowing blue sphere in the center, and the entire logo is set against a background of a blue sky with white clouds and a green landscape.

XSEDE

Getting Started with XSEDE

It's **easy** to get started as an XSEDE user:

1. Go to the main web site: www.xsede.org
2. Select 'How Do I Use XSEDE?' under the "User Services" menu

XSEDE

XSEDE User Portal: THE User Site

portal.xsede.org

- XSEDE User Portal (XUP) is designed to be the *only* site a **user** needs to use XSEDE
- XUP presents *only* info relevant to users
 - nothing else, so user info is easier to find
 - XUP also provides dynamic data about XSEDE systems
 - capabilities to manage usage, files, data
- After creating an account, a user can
 - request an allocation, and manage allocations
 - sign up for training
 - request help
 - manage file and data
 - and much more!
- Portal provides single sign-on to all XSEDE resources

XSEDE

XSEDE User Guides and News

- XSEDE provides intro user guides for every XSEDE-allocated system—no matter where it is actually hosted
 - Consistently structured and formatted
 - All available from website and XUP
 - Prepared using expertise of host sites
- XSEDE also provides up-to-date User News about every system, and XSEDE-wide services, available via:
 - Web/portal
 - Email
 - RSS feeds
 - Calendar feeds (for downtimes, training events, etc.)

XSEDE

XSEDE Allocations

- XSEDE allocates access/time on powerful, valuable systems providing different capabilities at NO COST TO YOU
 - HPC
 - High throughput computing
 - Remote visualization
 - Data storage
 - Etc.
- Users may request XSEDE staff support to assist with optimization of research codes, visualization, workflows, novel projects, and science gateways
- Single Sign-On allows you to use just one username and password (your User Portal one). You will be recognized by all XSEDE services on which you have an account, without having to enter your login information again for each resource.

XSEDE

XSEDE Allocations (2)

- Request allocations through the XSEDE User Portal
- It's **easy** to get a 'Startup allocation' —best way to get started
- Education allocations for classroom use
- Larger year-long 'research' allocations can be requested 4 times/year, are peer reviewed, and have a longer lead-time
- Quarterly webinars on writing allocations

XSEDE

XSEDE Training

- XSEDE provides extensive training
 - Covering every major resource
 - From beginner to advanced classes
 - At locations across the country
 - Online via
 - asynchronous technologies
 - Webcasts
- Web-based education credit courses
- Signing up is **simple**--in the XSEDE User Portal!

XSEDE

Getting Help

- Getting help is **easy—again**, via the XUP
 - XSEDE Knowledge Base
 - User Guides
 - Campus Champion directory for local help
 - You can also call the helpdesk **1-866-907-2383** 24x7 to request assistance

XSEDE

Community Engagement Activities

- Student Programs
- Under-represented Community Engagement
- Champions Program
- Campus Bridging
- Campus Visits
- Annual XSEDE Conference

XSEDE

Student Programs

- XSEDE Scholars
 - engaging undergraduates and graduates in year-long series of webinars attend annual XSEDE Conference
- XSEDE Summer Research Experience
 - Summer internship with XSEDE staff or user
- XSEDE Annual Conference
 - travel support for students to attend the annual Conference
- HPC University
 - Lists other student engagement opportunities

XSEDE

Under-represented Community Engagement

- Outreach to faculty and students at Minority Serving institutions
- Assist faculty with conducting their research using XSEDE resources
- Assist faculty with incorporating computational tools, resources and methods into the curriculum
- Minority Research Committee – faculty assisting one another
- Engaging students various programs

XSEDE

Campus Champions Program

- Over 150 campuses are members – no cost to join
- Champions receive monthly training and updates
- Champions provided with start-up accounts
- Champions are members of User Services team
- Forum for sharing and interactions
- Access to information on usage by local users
- Registrations for annual XSEDE14 Conference waived
- Community building across campuses

XSEDE

Campus Champions Role

- Raise awareness locally
- Provide training
- Get users started with access quickly
- Represent needs of local community
- Provide feedback to improve services
- Attend annual XSEDE14 conference
- Share their training and education materials
- Build community among all Champions

XSEDE

XSEDE

Extreme Science and Engineering
Discovery Environment

Campus Champion Institutions

Standard – 82

EPSCoR States – 49

Minority Serving Institutions – 12

EPSCoR States and Minority Serving Institutions – 8

Total Campus Champion Institutions – 151

 VIRGIN ISLANDS

Revised September 3, 2013

What is “Campus Bridging”?

The goal of campus bridging in general is to create a sense of “virtual proximity.” Any resource should feel as if it’s just a peripheral to their laptop or workstation.

The goal is to make it convenient and intuitive to simultaneously use your personal computing systems, departmental and campus systems (at your campus and others), and national resources liked XSEDE . . . all (almost) transparently and easily.

The XSEDE logo, which consists of the word "XSEDE" in a large, bold, white sans-serif font. The logo is set against a dark blue background that features a grid of white dots and lines, resembling a digital or network interface. The background also includes a faint image of a globe and some abstract shapes.

XSEDE

Campus Visits

- XSEDE visits campuses to
 - raise awareness
 - conduct professional development and curriculum development sessions,
 - assist with incorporating campus bridging tools and resources
 - meet with administrators, faculty, staff and students to effect institutional change
- Let us know how we can assist your campus

XSEDE

Call for participation – March 15 deadline!

www.xsede.org/xsede14

XSEDE14 Conference

- Theme is Engaging Communities
- Topics span accelerating discovery, advanced technologies, software, science gateways and portals, and education, outreach and training
- Over 700 people from academia, industry, government, and other organizations
- Support for Champions and student participation

XSEDE

Stay Connected

- XSEDE's public web site is www.xsede.org
- Create an XSEDE User Portal sign on and receive news and notices
- Training events are announced via the public web site; and registrations via the XSEDE User Portal
- For access to additional training and educational resources www.hpcuniversity.org

XSEDE

Our reach will forever
exceed our grasp, but,
in stretching our horizon,
we forever improve our world.

DATA SAMPLE PART 01:
The first sample was collected from the surface of the planet. It was a small, dark, irregularly shaped object. The sample was placed in a container and sealed. The container was then placed in a storage facility. The sample was later analyzed and found to be a piece of rock. The rock was found to be a piece of the planet's crust. The rock was found to be a piece of the planet's crust. The rock was found to be a piece of the planet's crust.

DATA SAMPLE PART 02:
The second sample was collected from the surface of the planet. It was a small, dark, irregularly shaped object. The sample was placed in a container and sealed. The container was then placed in a storage facility. The sample was later analyzed and found to be a piece of rock. The rock was found to be a piece of the planet's crust. The rock was found to be a piece of the planet's crust. The rock was found to be a piece of the planet's crust.

DATA SAMPLE PART 03:
The third sample was collected from the surface of the planet. It was a small, dark, irregularly shaped object. The sample was placed in a container and sealed. The container was then placed in a storage facility. The sample was later analyzed and found to be a piece of rock. The rock was found to be a piece of the planet's crust. The rock was found to be a piece of the planet's crust. The rock was found to be a piece of the planet's crust.

DATA SAMPLE PART 04:
The fourth sample was collected from the surface of the planet. It was a small, dark, irregularly shaped object. The sample was placed in a container and sealed. The container was then placed in a storage facility. The sample was later analyzed and found to be a piece of rock. The rock was found to be a piece of the planet's crust. The rock was found to be a piece of the planet's crust. The rock was found to be a piece of the planet's crust.
