

# The Northwest Indiana COINCIDENT INDEX

## April 2015 Release

In April the Northwest Indiana Coincident Index remained stable at its March value of 139.9. The forecast for the regional economy over the next six months continues to be for 1-2% growth.

The Northwest Indiana Coincident Index measures the current pulse of the economy in Northwest Indiana. The current value of the Index and a six-month forecast is released every month in a brief update. Analysis and further details are released in quarterly summaries.
