

INDIANA UNIVERSITY BLOOMINGTON

Gierut / Learnability Project

The Learnability Project was founded in 1985 by Judith A. Gierut, Professor Emerita of Speech and Hearing Sciences, Indiana University. Through funding from the National Institutes of Health, the project served as a test site in evaluation of the efficacy of clinical treatment for preschool children with functional (nonorganic) phonological disorders. Children who enrolled contributed longitudinal descriptive phonological samples for linguistic analysis. They also received clinical treatment, designed as single-subject experiments, to establish the optimal teaching conditions to promote phonological learning. Experimental studies were based on the triangulation of theoretical models of linguistics, psycholinguistics, and speech-language pathology, with the aim of bridging theory with application and science with best practices. The Gierut / Learnability Project collections accord with the data-sharing plan of the National Institutes of Health and are intended for broad use by scientists, clinicians, and students interested in language and learning.

Content Statement

This document was retrieved from the PUBLICATIONS collection of the Gierut / Learnability Project archived in IUScholarWorks <https://scholarworks.iu.edu/dspace/handle/2022/20061>. By downloading and/or using the content herein, the user agrees to the Creative Commons copyright license CC BY-NC-ND. The copyright license permits the user to access and share the Gierut / Learnability Project collections, with appropriate acknowledgement and credit to the creators/authors. The copyright license denies the user the right to make changes to the collections or develop the collections commercially. Learnability Project Publications

This bibliography provides citations for reports published under NIH DC001694, *Development of Phonological Categories*, 1992-2016. Links provide the user with direct access to the publication and/or the publisher pursuant to copyright law.

The PUBLICATIONS collection of the Gierut / Learnability Project likewise provides direct access to publications, but only for those limited articles where permission was granted by the publisher for deposit in an institutional repository.

Table of Contents

Preface, Daniel A. Dinnsen & Judith A. Gierut

PART I. BACKGROUND TO THE STUDY

Chapter 1: Fundamentals of optimality theory, Daniel A. Dinnsen

Chapter 2: Phonological disorders and the Developmental Phonology Archive, Judith A. Gierut

Chapter 3: Fundamentals of experimental design and treatment, Judith A. Gierut

PART II. RESEARCH REPORTS: OPACITY EFFECTS

Chapter 4: A typology of opacity effects in acquisition, Daniel A. Dinnsen

Chapter 5: An unusual error pattern reconsidered, Daniel A. Dinnsen & Ashley W. Farris-Trimble

Chapter 6: Innovations in the treatment of chain shifts, Michele L. Morrisette & Judith A. Gierut

PART III. RESEARCH REPORTS: DEVELOPMENTAL SHIFTS AND LEARNING

Chapter 7: Developmental shifts in children's correspondence judgments, Judith A. Gierut & Daniel A. Dinnsen

Chapter 8: Recalcitrant error patterns, Daniel A. Dinnsen

Chapter 9: The prominence paradox, Daniel A. Dinnsen & Ashley W. Farris-Trimble

PART IV. RESEARCH REPORTS: ACQUISITION OF CONSONANT CLUSTERS

Chapter 10: Syllable onsets in developmental perception and production, Judith A. Gierut, Holly Storkel & Michele L. Morrisette

Chapter 11: Experimental instantiations of implicational universals in phonological acquisition Judith A. Gierut

Chapter 12: Gapped s-cluster inventories and faithfulness to the marked, Ashley W. Farris-Trimble & Judith A. Gierut

Chapter 13: A typological evaluation of the split margin approach to syllable structure in phonological acquisition, Jessica A. Barlow & Judith A. Gierut

Chapter 14: Constraints on consonant clusters in children with cochlear implants, Steven B. Chin

PART V. EPILOGUE

Chapter 15: On the convergence of theory and application, Daniel A. Dinnsen & Judith A. Gierut

Constraints and definitions
