October 2015 Release

In October the Northwest Indiana Coincident Index remained at 141.3. The index remains unchanged despite a 5% increase in steel production and the addition of 2,300 jobs, which returns employment to the level from the start of the year.

The Northwest Indiana Coincident Index measures the current pulse of the economy in Northwest Indiana. The current value of the Index and a six-month forecast is released every month in a brief update. Analysis and further details are released in quarterly summaries.
