KARL F. SCHUESSLER INSTITUTE FOR SOCIAL RESEARCH

Introduction to Text Mining for Social Scientists

Helge-Johannes Marahrens

Department of Sociology, Indiana University

Textual data are central to the social sciences. However, they often require several pre-processing steps before they can be utilized for statistical analyses. This workshop introduces a range of Python tools to clean, organize, and analyze textual data. It is intended for researchers who are new to working with textual data, but are familiar with Python or have completed the Introduction to Python workshop. Computers with Python pre-loaded are available in the SSRC on a first-come, first-served basis.

Helge-Johannes Marahrens is a fourth-year doctoral student in the Department of Sociology.

This workshop is the third in a three-part series. To access materials from the previous workshops, “Introduction to Python for Social Scientists” (November 1, 2019) and “Introduction to APIs for Social Scientists” (January 31, 2020). visit the WIM page at go.iu.edu/wim.

Friday
February 14, 2020
2-4:30pm

In 2019-2020, Indiana University is celebrating its Bicentennial, and the Workshop in Methods is celebrating its tenth year providing social science research methods workshops. Join us as WIM celebrates by looking back at the workshops we've offered, and ahead to social science research methods for the future.
