Key to ........................................................................ 550
Birds of Lake and Porter Counties .......................... 91
Blair Artesian Well—Analysis of Water from ........ 75
Blatchley, W. S.—Papers by .................................. 1, 17, 25, 106, 155
Blue Lick, Jackson County—Analysis of Clay from .... 146, 149
Clay in Vicinity of ...................................................... 145
B. & O. S. W. Railway ................................................. 30, 143, 145
Bog Iron Ore ............................................................... 72
Boulders ................................................................. 31, 46, 47
Bryozoa—Fossils of, in Indiana ............................. 445
Bull's Eye Lake .............................................................. 48
Butler, A. W. .............................................................. 15
Paper by ................................................................. 515
Cady Marsh ....................................................... 34
Calumet Beach ................................................... 35
Region ............................................................ 26, 38
River ............................................................... 41
Campbell, Dr. J. L. ............................................. 56, 60, 84
Report of, on Drainage of Kankakee Marshes ............... 61
Canada Thistle ................................................... 98
Cassia leptophylla ................................................ 91
Cedar Lake ....................................................... 43, 49

Map of ............................................................ 56
Cement Rock near Laurel ........................................ 216
Cephalopoda—Fossils of, in Indiana ...................... 475
Cheshire, W. W. .................................................. 84
Chesterton—Analyses of Clays from ......................... 137, 149
Clays in Vicinity of ............................................ 137
Chicago Hydraulic Press Brick Co. ...................... 135
Chicago, Lake ..................................................... 32
Outlet .............................................................. 32, 37
Clay County—Mines of ......................................... 817, 899
Clays—Definition of ............................................ 106
Impurities of ..................................................... 110
Iron Compounds ................................................... 111
Lime ................................................................. 111
Magnesia ........................................................... 111
Potash ............................................................... 112
Sand ................................................................. 111
Soda ................................................................. 112

Origin of ......................................................... 107
Properties of ..................................................... 109
Induration ......................................................... 110
Insusceptibility .................................................. 110
Insolubility ....................................................... 110
Plasticity ......................................................... 109
Varieties of ..................................................... 107
Alluvial ............................................................ 108
Drift ................................................................. 108
Marly ............................................................... 108
Residual ........................................................... 107
Sedimentary ...................................................... 107
Silty ................................................................. 108
Clay Industries of Indiana—Growth of ......................... 9, 106
Clays of Northwestern Indiana .............................. 106

Statistics of ..................................................... 150
Clear Lake ........................................................ 32
Clinton Limestone ................................................. 18, 207
Cnemidophorus sexlineatus ................................... 82
Caenurus arvensis ............................................... 98
Coal—Amount Mined in Indiana in 1897 ..................... 4, 386, 375
Annual Production of, 1880 to 1897 ........................ 366
Measures of Indiana ............................................. 22
Mines—List of by Counties ................................... 360
Miners—Number in State ....................................... 4, 383
Report of Mine Inspector ..................................... 289
Washing Machinery .............................................. 394
Coal Survey—Progress of ...................................... 2
Coelesterata—Fossils of, in Indiana ......................... 406
Compass Plant .................................................... 97
Convict Labor—Utilization of ................................ 11
Cranberries—Production of, in Lake and Porter Counties 69, 98
Crown Point—Clays in Vicinity of ......................... 127
Latitude of ....................................................... 25
Wells of ........................................................... 17, 44
INDEX.

Davies County—Mines of ............................ 330, 369
Decatur County—Limestone Quarries of .............. 219
Derbyshire Falls .................................. 217, 244

Dinwiddie, Hon. Jerome ............................ 104
Dragon Flies—Paper on ............................ 408
Dryer, Dr. Chas. R. .............................. 23, 52
Dubois County—Mines of ......................... 335, 370
Dunes, Sand ..................................... 39, 40

Earl Park—Clays in Vicinity of .................. 113
Echinodermata—Fossils of, In Indiana ............... 422

Elphes primigenius .............................. 89
Elevations in Lake and Porter Counties ............. 103
Eliza Lake ....................................... 49, 52
Entomostraca—Fossils of, In Indiana ............... 482

Erethizon dorsatus .............................. 90
Euomurostra—Fossils of, In Indiana ................. 482

Fancher Lake ..................................... 51
Fauna of Lake and Porter Counties .................. 89
Fayette County—Limestone Quarries of .............. 258

Fiber sibethicus ................................. 90
Fish Lake ........................................ 49
Fisher, Robert—Report of ......................... 289
Flint Lake ....................................... 52
Flora of Lake and Porter Counties ................ 92
Foerste, Dr. Aug. ............................... 14, 19

Fossil Catalogue of ................................ 14, 407
Fossil Bibliography of ............................ 15, 489

Franklin County—Limestone Quarries of ............ 241
Freetown, Jackson County—Clays in Vicinity of .... 145

Fuels of Indiana ................................. 1
Furness, E. L. .................................... 104

Furness, Hon. L. G. ................................ 104

Garden City—Analyses of Clay from ................ 134, 149
Clays in Vicinity of ................................ 133

Gas; Natural—Companies, List of .................. 288
Field—Condition of ................................ 269
Development of ................................... 284
Future of, In Indiana ........................... 7, 282
History of Indiana Field ......................... 261

Law Concerning Waste of ......................... 276
Original Area of Field of ......................... 6
Pressure of Wells ................................ 6
Report of Supervisor of ......................... 6, 257

Waste of ........................................ 274
Wells—Condition of .............................. 273

Gastropoda—Fossils of, In Indiana ................. 466

Gaultheria-provincians ........................... 98

Genesee Shale—Analysis of ......................... 27
Origin of ........................................ 27
Properties of ................................... 27

Gibson County—Mines of ......................... 336, 370

Glacial—Epochs ................................. 30
Period in Lake and Porter Counties ................. 29
Stere ........................................... 30
