Pantheon Mural

Vincennes, IN

Mural Panels on the Pantheon

The goal of this mural is to celebrate the entrepreneurs and pioneers of Vincennes, Indiana. The Pantheon building has a long history in Vincennes and has had several uses throughout the years but is currently a co-working space. This mural is meant to celebrate industries of Vincennes old and new. Some of these industries include watermelon farming, breweries, lumber, glass manufacturing and even some current business from the Pantheon. The long winding line throughout the panels represents the Wabash river acts as an element to tie the panels together as the facade of the building breaks up the full mural.

There will be a seating area to be used by the employees of the Pantheon Coworking Space as well as others who come to visit the Pantheon mural.
