Feb. 1985

This is the second volume in the Trickster Press series, "Occasional Papers in African Folklore and Music," and is edited by Daniel Avorgbedor and Kwesi Yankah. The series is meant to make possible the dissemination of theoretical and field research in African folklore/music and is published periodically.

CROSS RHYTHMS (2) is a fine collection of essays all of which are based on field research by the contributors. It is hoped that the collection will be a significant contribution to the study of African folklore and music.
