Indiana is a water-rich state.

Water connects us all.

Great Lakes

Indiana Nwashes — A network of glacial lakes that formed a large glacial lake system and eventually spread across the area. The resulting water systems eventually drained through mudflats and channels, creating many of the lakes and wetlands in Indiana.

Lake Erie Watershed — A series of tributary streams that flow into Lake Erie, including the Maumee River, St. Joseph River, and St. Marys River. These rivers carry water from a wide range of sources, including agriculture, industry, and urban centers.

Kankakee River

Kankakee Marsh — The marshy land along the Kankakee River, which is an important wetland for bird and wildlife populations.

Wabash River

Wabash River Watershed — A series of tributary streams that flow into the Wabash River, including the Maumee River and the St. Joseph River. These rivers carry water from a wide range of sources, including agriculture, industry, and urban centers.

Wabash River Falls — The series of waterfalls along the Wabash River, including the Falls of the Ohio and Horsehead Falls.

White River

White River Watershed — A series of tributary streams that flow into the White River, including the White River and the Vermillion River. These rivers carry water from a wide range of sources, including agriculture, industry, and urban centers.

White River Falls — The series of waterfalls along the White River, including the Falls of the Ohio and Horsehead Falls.

Ohio River

Ohio River Watershed — A series of tributary streams that flow into the Ohio River, including the White River and the Vermillion River. These rivers carry water from a wide range of sources, including agriculture, industry, and urban centers.

Ohio River Falls — The series of waterfalls along the Ohio River, including the Falls of the Ohio and Horsehead Falls.

Lake Michigan

Lake Michigan — The largest lake in the United States, which is an important source of water for the surrounding region. Lake Michigan is an important source of water for the surrounding region.
