

MAPPING HAZARDS

INDIANA GEOLOGISTS USE MODERN MAPPING TECHNOLOGY TO LOCATE GEOHAZARDS

Landslides, earthquakes, karst, mine subsidence, and coastal erosion are all geologic hazards in Indiana. IGWS geologists are responding to these dangers by creating maps to support informed land-use decisions. Homeowners, educators, and emergency responders can use IGWS research to identify geologic hazards and mitigate their danger.

Learn about IGWS's hazard research by scanning our QR code or visiting igws.indiana.edu/hazards.
