

Research Incentive Grant Report

by Taemin Park, Herman B Wells Library, Indiana University, Bloomington

My research on Wikipedia has been delayed due to a lack of accessibility to Elsevier's Scopus database. However as a recent reviewer of an Elsevier journal, I have been allowed to search SCOPUS. The extent of Wikipedia's presence in the formal scholarly communication in the journal publishing will be examined. Data for this research will be collected using ISI's Web of Knowledge and Elsevier's Scopus in terms of references and citation data.

I am hoping to report the acceptance of this research in a scholarly journal by this time in 2011.
