

ABOUT THE AUTHORS

sydney adams

Sydney is a sophomore studying psychology, clinical science, and public health. She is an undergraduate researcher in IU's Developmental Psychopathology Lab, currently interested in studying social determinants of mental health and disparities in mental healthcare. She is also personally invested in art, literature, and creative writing. At IU, she is involved in the Wells Scholars Program, the Autism Mentoring Program, the Independent Council for Women, and Best Buddies. She hopes to someday pursue a PhD in clinical psychology while also maintaining a lifelong appreciation of the humanities.

stuart sones

Stuart Sones is a junior in the Arabic Flagship Program studying Anthropology and Middle Eastern studies with a minor in Spanish. As a research fellow for the Platform Global Popular Music Laboratory, his primary interests center around performance, intertextuality, and music in social movements in North Africa. Outside of class, Stuart is the co-president of Students for Peace in the Middle East and plays in the Samulnori Korean Percussion Ensemble. After graduation, Stuart hopes to pursue graduate studies in Anthropology.

grace mcdougall

Grace is a junior from West Lafayette, IN obtaining a degree in Secondary English Education with minors in French and English as a New Language. At IU, Grace works as a writing tutor for Writing Tutorial Services, and, during her free time, she enjoys reading, knitting, and hiking. Next spring, she will do her student teaching on the Navajo Nation. After graduating, she intends to teach in Indiana and later pursue a graduate degree in either education or literature.

susan reed

Susan Reed graduated from Indiana University Bloomington in 2018 with Biology Departmental Honors after earning a Biology B.S., Environmental Sustainability B.A., and minor in Animal Behavior. She took on a rigorous undergraduate thesis project, balancing classes with an intense fieldwork schedule, data collection, and animal husbandry. She is interested in organisms' adaptability to environmental change, annual cycle timing, mechanisms of migration, phenology misalignments, and avian physiology. She is excited to help bridge the communication gap between scientists, policy makers, and the general public. Susan aims to go to graduate school to study evolutionary ecology.

calvin isch

Calvin Isch is a senior majoring in cognitive science, minoring in math, and pursuing a LAMP certificate. His research interests center on how ecological constraints shape human cognition. He is currently exploring these interests with an honors thesis on how humans think about the future. Outside of research, Calvin is an avid rock-climber, long-distance runner, and mountain biker. He also participates in organizations that allow him to share ideas with the IU community. After college, Calvin will teach secondary math and pursue continued education in cognitive science.
