

## eclipse

Christi Concus, Indiana University Kokomo

the moon is not lost  
it is only pressed  
beneath the Earth's  
heavy shadow  
like a leaf  
between the pages  
of a thick book  
like my heart  
under all this  
life  
And when it is  
uncovered  
I will find it more  
beautiful  
for having been  
hidden  
awhile.
